Chapter IV	Biosketches	279
Chapter V	Career Summary	507
Chapter VI	Sources	511
Chapter VII	Epilogue	513

# ACKNOWLEDGMENTS

This manuscript is essentially a compilation of the descriptions of the Chief Residency as seen through the eyes of the participants. The time and effort of each individual in writing their own perspective is gratefully appreciated.

Three individuals were indispensable in shepherding this work from its inception to completion.

Bettie C. Houston obtained much of the pertinent material from the Chief Residents. Throughout the long process of collating the data and typing the manuscript, she continually approached these tasks with a smile.

Gloria H. Probeck, as the Coordinator for the Department of Medicine Alumni Affairs Office, initiated the data gathering process which began as a major part of the first Chief Residents' Reunion. Through her personal interaction with the Chief Residents, she assured that their responses were nearly unanimous.

Judith C. Rembert carried out the laborious task of codifying the voluminous personal data and formatting the information in a uniform manner. In addition, she carefully revised and edited the manuscript.

Drs. Christopher M. O'Connor and William G. Anlyan were responsible for obtaining financial support from The Duke Endowment. Financial support was also obtained from the Institute of Medical Research and the Research and Development Service, Durham, Veterans Affairs Medical Center as well as the Division of Cardiology, Department of Medicine, Duke University Medical Center.
