This book is dedicated to the thousands of university students who have been exposed to the social context approach. Over the years they have praised the approach as giving them immediate insight into what sociology is as a discipline, what meaning the context approach has in their lives and how they have applied it to their lives. Their encouragement has resulted in bringing the social context approach into mainstream sociology.

Marty Zusman—“I dedicate this book to my wife, Jane. Without her insistence and encouragement this book would not have seen daylight. I also thank my family; Rochelle, Amie, Steven, Andrew, Jackie, Julie, John and Jennifer. I would also like to thank Kristie Gilmore who typed the early chapters of the manuscript. Finally, on a personal note, I was a student of Marvin Olsen who once told me, ‘If you want to learn what sociology is all about, think of the levels of social organization.’ Thanks, Marv, as a teacher and scholar, your ideas live on.”

David Knox—“To Cameron Emmott who is taking her first steps into the world of social context.”

Tracie Gardner—“To my daughter, Ellen Rose, who continually inspires me with her innocent wisdom.”
