UNDERSTANDING ENVIRONMENTAL LAW

THIRD EDITION

Philip Weinberg
Professor of Law St. John’s University School of Law

Kevin A. Reilly
Principal Appellate Court Attorney New York State Supreme Court Appellate Division, First Department Adjunct Professor of Law St. John’s University School of Law & Pace University Graduate Program in Environmental Science
DEDICATION

To Mary, Bill, and Matt.
—Philip Weinberg

To my children, Kevin and Alanna, who, everyday, make everything worthwhile, and to my wife Mary.
—Kevin A. Reilly
ACKNOWLEDGEMENTS

As the historian Barbara Tuchman sagely observed, “the best book is a collaboration between author and reader.”* We have endeavored to keep our end of the bargain by furnishing students and practitioners with a concise, direct introduction to the burgeoning field of environmental law.

Environmental law, an increasingly significant area of legal study and practice, encompasses a full range of issues from tort law through property law to constitutional considerations. This volume attempts to present this mosaic, as its title suggests, in an understandable way. We have tried to avoid either undue concentration on the individual titles or an equally inappropriate focus on generalities.

The book covers not only the traditional terrain of air and water quality, solid and hazardous waste, and pesticides, but also the environmental implications of land use, energy generation and use, and the increasingly important area of international environmental law. It also tries to connect environmental law with the political and constitutional bases for the statutes and court decisions it examines.

Environmental law does not presuppose a background in science, and the references in this book to chemistry, biology and hydrogeology are kept simple and, we hope, understandable — a task rendered easier by the authors’ own lack of scientific expertise.

As the reader will see, environmental law was not born fully-grown, like Botticelli’s Venus, with the advent of the modern regulatory statutes. It stems from tort law, property law and related concepts that trace their roots to the common law. This book attempts to relate those common-law principles to today’s regulatory framework, from which modern environmental law directly descends.

Readers should know that Philip Weinberg wrote chapters one through four and nine through thirteen, as well as minor portions of chapters five, six, and eight. Kevin Reilly wrote chapters seven and fourteen and the bulk of chapters five, six, and eight.

The authors are deeply indebted to Heidi Luna (St. John’s Law School 1999) for invaluable research assistance in preparing the book. We earnestly hope this book will prove useful to the reader in achieving precisely what its title proffers: understanding environmental law.

§ 7.07 THE BROWNFIELDS ISSUE: THE AMOUNT OF CLEANUP REQUIRED

[A] Of “Brownfields” and “Greenfields” | 310 |
[B] The Awakening Federal Interest | 312 |
[C] Proposed Solutions to Brownfields Dilemma | 313 |
| [1] Limitation of Ownership-Derived Liability | 313 |
| [a] | Purchaser Liability | 313 |
| [b] | Lender Liability | 314 |
| [3] | Voluntary Cleanups | 315 |

§ 7.08 EMERGENCY PLANNING AND COMMUNITY RIGHT TO KNOW ACT | 317 |
Volume 1 Table of Contents

[A] Requirements and Purposes of Act ........................................... 317
[B] Emergency Planning ................................................................. 317
   [1] Local Responsibilities for Emergency Planning .................. 317
[C] Emergency Notification .......................................................... 318
[D] Reporting Requirements ......................................................... 319
   [1] Material Safety Data Sheets ............................................... 319
   [2] Inventory Forms ............................................................... 319
   [4] Medical Emergencies ......................................................... 320
[E] EPA as a Data Clearinghouse ...................................................... 320
   [1] EPA Must Maintain Records on National Movement of Chemicals . 320
   [2] EPA Must Maintain List of Toxic Chemicals ......................... 320
   [3] Citizens May Petition to Add a Chemical to EPA’s List .......... 321
[F] Enforcement ............................................................................. 321
   [1] Compliance Orders and Penalties ...................................... 321
   [2] Citizen Suits ........................................................................ 321
      [a] Grounds for Suit ............................................................ 321
      [b] Notice; Suits for Past Violations ..................................... 321
      [c] Standing ......................................................................... 322
      [d] Costs and Fees; Intervention .......................................... 322
   [3] Suits by State or Local Authorities ..................................... 323

CHAPTER 8 TOXIC SUBSTANCES ......................................................... 325

§ 8.01 PESTICIDES ....................................................................... 328
[A] Regulation of Pesticides ......................................................... 328
[B] Registration ............................................................................. 328
   [1] Registration Requirements, Generally ................................ 328
   [2] Information Required to Achieve Registration ................... 329
   [3] Registration Is for General or Restricted Use ..................... 329
   [5] State Registration ............................................................... 330
   [6] Suspension and Cancellation .............................................. 330
   [7] Experimental Use Permits and Variances ......................... 330
   [8] Public Access to Information .............................................. 331
[C] Labeling ................................................................................. 331
   [1] General Labeling Requirements ...................................... 331
   [2] Preemption ......................................................................... 331
[D] Pesticide Residues in Foods ..................................................... 332
[E] Enforcement ............................................................................. 332
§ 8.02 REGULATING TOXIC SUBSTANCES: THE TOXIC SUBSTANCES
CONTROL ACT (TSCA) ........................................ 333
[A] Purposes of Act ........................................... 333
[B] Chemicals Included in and Excluded from TSCA ............ 334
[C] Testing Requirements ..................................... 334
[2] Standards Used for Testing ............................. 335
[3] Actions to Prevent or Reduce Risk ...................... 336
[D] Manufacturing and Processing Notices for New Chemicals or New Uses ........................................ 336
[2] Required Contents of Notice ............................ 336
[3] Issuance of Interim Order; Injunctive Relief .......... 337
[E] Regulation of Hazardous Chemicals .................... 337
[1] EPA’s Promulgation of Rules ............................ 337
[4] Regulation of Polychlorinated Biphenyls (PCBs) ....... 338
[5] Imminent Hazards ....................................... 339
[F] Compilation of Information .............................. 339
[1] Reporting and Record Keeping by Regulated Parties .... 339
[2] EPA’s Inventory of Toxic Chemicals ................... 340
[3] Inspections .............................................. 340
[G] Exports and Imports ..................................... 340
[H] Enforcement ............................................. 341
[1] Criminal and Civil Penalties ............................ 341
[2] Other Civil Remedies ................................... 342
[3] Citizen Suits ........................................... 342
§ 8.03 TOXIC TORT LITIGATION ............................ 343
[A] Liability .................................................. 343
[1] Background ............................................. 343
[2] Standards of Liability .................................. 343
[a] Strict Liability ......................................... 343
[b] Negligence; Interference with Commercial Expectations; Emotional Distress .................................. 344
[c] Product Liability and Failure to Warn .................. 344
[3] Causation ............................................... 345
[a] Duty of Care ........................................... 345
[b] Burden of Proof ........................................ 345
[c] Multiple Defendants .................................. 345
[4] Suits Against Government Bodies ....................... 346
## Volume 1 Table of Contents

[B] Damages ................................................. 347
[C] Defenses .................................................. 348
   [1] Statute of Limitations ................................. 348
   [4] Bankruptcy ............................................ 349
[D] Procedure and Evidence ............................... 350
   [1] Class Actions ......................................... 350
   [2] Jurisdiction .......................................... 351
   [3] Discovery ............................................. 351
[E] Liability Insurance ..................................... 352
   [1] “Sudden and Accidental” Limitation ................ 352
§ 8.04 RADON .................................................. 353
[A] Health Risks ............................................. 353
[B] Regulation of Radon as a Toxic Substance .......... 354
   [1] EPA’s Responsibility to Provide Information ...... 354
§ 8.05 ASBESTOS .............................................. 355
[A] Background of Problem; Regulation Under State and Federal Law ... 355
   [1] Asbestos in Schools .................................. 356
   [2] Asbestos Abatement .................................. 357
[C] Occupational Safety and Health Act Regulation .......... 357
[D] Clean Air Act ............................................ 358
§ 8.06 CHLOROFLUOROCARBONS (CFCs) AND OTHER OZONE DEPLETING CHEMICALS ............................................. 358
[A] Background of Problem ................................. 358
[B] Regulation Under Clean Air Act ....................... 359
   [1] CFC Listing ........................................... 359
   [2] Labeling ............................................... 359
   [3] CFC Ban ............................................... 359
[C] Environmental Tax on CFCs ............................ 360
§ 8.07 LEAD .................................................... 360
[A] Background of Problem; Regulations .................. 360
[B] Lead Exposure Reduction Under Toxic Substances Control Act .......... 362
[C] Residential Lead-Based Paint Hazard Reduction Act .......... 363
   [1] Purposes of Act ....................................... 363
Volume 1 Table of Contents

[D] Regulation of Lead Emissions Under the Clean Air Act .... 365

CHAPTER 9 NOISE .................................................. 367

§ 9.01 NOISE CONTROL ACT ........................................ 367
[A] Background of Act ............................................. 367
[B] Congressional Finding; General Requirements of Act .... 368
[C] Maximum Ambient Standards for Noise .................... 368
[D] Warranty Requirement and State Regulation of Noise .... 368
[E] Labeling Requirements ........................................... 369
[F] Remedies .......................................................... 369
§ 9.02 STATE AND LOCAL LAWS ................................... 369
§ 9.03 AIRCRAFT NOISE ............................................ 370
[A] Inverse Condemnation Suits .................................... 370
[B] Nuisance Actions ................................................ 371
§ 9.04 AIRCRAFT NOISE: FAA REGULATIONS .................. 372
§ 9.05 AIRCRAFT NOISE: STATE AND LOCAL AIRPORT CONTROLS . 373
§ 9.06 OCCUPATIONAL NOISE ..................................... 374

CHAPTER 10 FISH AND WILDLIFE ................................. 375

§ 10.01 HUNTING AND FISHING LAWS ......................... 375
§ 10.02 DEEP SEA FISHING ......................................... 377
[A] Background ....................................................... 377
[B] License Requirements ........................................... 377
[C] International Treaties .......................................... 377
[D] Drift Nets ........................................................ 378
§ 10.03 ENDANGERED SPECIES ACT AND RELATED STATUTES .... 378
[A] Background of Endangered Species Act ..................... 378
[B] *Tennessee Valley Authority v. Hill* and the Creation of Endangered Species Committee ............................................. 379
[C] “Taking” of Endangered Species Is Prohibited ............... 379
[D] Lesser Protection Exists for Threatened Species .......... 379
[E] Preemption Issues ............................................... 380
[F] Enforcement, Standing, and ESA’s Citizen Suit Provision . 380
[G] Other Wildlife Protection Statutes ............................ 380
§ 10.04 STATE STATUTES ............................................. 381
§ 10.05 INTERNATIONAL CONTROLS .............................. 382
§ 10.06 VOLUNTARY CREATION OF WILDLIFE HABITAT .......... 383
**Volume 1 Table of Contents**

**CHAPTER 11  LAND USE ........................................... 385**

| § 11.01 | OVERVIEW ................................................. 386 |
| § 11.02 | CRITICAL AREAS: WETLANDS, COASTAL ZONES, SHORELANDS, AND SUBMERGED LANDS AND FLOODPLAINS 386 |
| [A] | Wetlands ................................................. 386 |
| [B] | Coastal Zones, Shorelands, and Submerged Lands ........................................ 388 |
| [1] | State and Local Statutes ........................................ 388 |
| [2] | Coastal Zone Management Act ........................................ 389 |
| [3] | Underwater Lands .............................................. 389 |
| [C] | Floodplains ................................................. 390 |
| § 11.03 | STATE REGIONAL PLANNING ................................... 391 |
| [A] | Local Zoning and Its Environmental Implications ........................................ 391 |
| [B] | Need to Protect Environmentally Critical Areas ........................................ 392 |
| [C] | State Planning and Land Use Statutes ........................................ 392 |
| § 11.04 | HISTORIC PRESERVATION ....................................... 393 |
| [A] | Municipal Controls Protecting Landmarks ........................................ 393 |
| [B] | Landmarks and Taking Claims .......................................... 394 |
| [C] | Religious Buildings and Free Exercise Claims ........................................ 395 |
| [D] | Maintenance and Rehabilitation ........................................ 395 |
| [E] | National Register of Historic Places ........................................ 396 |
| § 11.05 | WILDERNESS AREAS AND PUBLIC LANDS ........................ 396 |
| [A] | National Forests ............................................... 396 |
| [B] | Bureau of Land Management Property ........................................ 397 |
| [C] | National Parks and Wildlife Refuges ........................................ 398 |
| [D] | Wilderness Protection ........................................... 398 |
| § 11.06 | POWER PLANT SITING ........................................... 399 |
| [A] | In General ....................................................... 399 |
| [B] | Hydroelectric Power Plants .......................................... 399 |
| [C] | Nuclear Power Plants ............................................ 400 |
| [D] | State Power Plant Siting Statutes ........................................ 400 |
| § 11.07 | ESTHETIC CONTROLS ........................................... 400 |
| § 11.08 | AGRICULTURAL LANDS .......................................... 402 |
| § 11.09 | CONSERVATION EASEMENTS AND LAND TRUSTS ...................... 403 |

**CHAPTER 12  ENERGY PRODUCTION AND MINERAL EXTRACTION ......................... 405**

| § 12.01 | SOLAR ENERGY AND WIND POWER ................................ 406 |
| [A] | Background .................................................... 406 |
| [B] | Solar Energy ................................................... 406 |
| [C] | Wind Power ...................................................... 407 |
| § 12.02 | NUCLEAR ENERGY .............................................. 407 |
Volume 1 Table of Contents

[B] Licensing Power Plants ................................... 408
[C] Evacuation Plans ........................................... 409
[D] Radioactive Waste Disposal ............................... 410
[E] State Controls and Preemption Issues .................. 412
[F] Liability Issues ........................................ 412
§ 12.03 GEOTHERMAL ENERGY ................................. 413
§ 12.04 COAL AND MINERAL SURFACE MINING ............. 414
   [A] Surface Mining Control and Reclamation Act ........ 414
   [B] Laws to Prevent Subsidence of Surface Lands ....... 416
§ 12.05 SYNTHETIC FUELS ..................................... 416
   [B] Federal Subsidies for Biomass Energy and Ethanol ... 417
   [C] Compressed Natural Gas, Electric, and Hydrogen Powered Vehicles 418
§ 12.06 ENERGY CONSERVATION ............................... 419
   [A] Automotive Fuel Efficiency ............................ 419
   [B] Appliance Efficiency .................................. 419
   [C] Electricity Conservation ............................... 420
      [1] Public Utility Regulatory Policies Act ............. 420

CHAPTER 13 INTERNATIONAL ASPECTS OF ENVIRONMENTAL PROTECTION 423

§ 13.01 BASIC PRINCIPLES ................................... 423
   [A] Treaties Governing Environmental Issues .............. 423
   [B] Applicable Principles of International Law ............ 424
   [C] Sustainable Development and Population Increase .... 425
   [D] Conflicting Interests of Developed and Developing Countries 425
§ 13.02 GLOBAL CLIMATE CHANGE ............................ 426
   [A] Causes and Effects of Global Warming ............... 426
   [B] The Climate Change Convention ......................... 427
§ 13.03 OZONE LAYER PROTECTION ............................ 429
§ 13.04 BASEL CONVENTION ON HAZARDOUS WASTE SHIPMENT . 430
Volume 1 Table of Contents

§ 13.05 THE ENVIRONMENT AND FREE TRADE ............................................. 431
§ 13.06 BIODIVERSITY ................................................................................. 432
  [A] Importance of Maintaining Biodiversity ........................................... 432
  [B] Convention on Biological Diversity .................................................. 434
  [C] Use of Genetic Resources: Who Profits? .......................................... 434
  [D] Debt-for-Nature Swaps .................................................................... 435

CHAPTER 14 INNOVATIONS AND TRENDS ................................................... 437

§ 14.01 INTRODUCTION ................................................................................. 438
§ 14.02 THE “XL” PROGRAM ....................................................................... 439
  [A] Background and Description of Program .......................................... 439
    [1] Greater Participation by Industry in Choosing Strategies to Reduce Pollution .................................................. 439
    [2] Pilot Projects ...................................................................................... 439
    [3] Role of Local Agencies ...................................................................... 440
  [B] Goals .................................................................................................. 440
  [C] Types of XL Projects ......................................................................... 441
    [1] Facility-based .................................................................................... 441
    [2] Industry-wide ................................................................................... 441
    [4] Community-based ........................................................................... 442
§ 14.03 OTHER COMMUNITY-BASED PROGRAMS .................................... 442
§ 14.04 CODE OF ENVIRONMENTAL MANAGEMENT PRINCIPLES FOR FEDERAL AGENCIES ........................................................................... 443
  [A] Purpose of the Code .......................................................................... 443
  [B] Code Principles .................................................................................. 443
§ 14.05 INCENTIVES FOR SELF-POLICING .............................................. 444
§ 14.06 PUBLIC PERFORMANCE-BASED PERMITTING .............................. 444
§ 14.07 VOLUNTARY PARTNERSHIPS BETWEEN BUSINESSES AND THE EPA .............................................................................................................. 445
§ 14.08 RESOURCE CONSERVATION CHALLENGE ................................ 446
  [A] Solid Waste ........................................................................................ 447
  [B] “Green” Electronics .......................................................................... 447
  [C] “Green” Buildings ............................................................................ 448
  [D] The Reduction of Priority and Toxic Chemicals ............................... 449
§ 14.09 ISO 14000 AND ENVIRONMENTAL MANAGEMENT ....................... 449
  [A] International Organization for Standardization (“ISO”) .................... 449
    [1] Background and Environmental Goals ........................................... 449
    [2] Standards Are Voluntary ................................................................. 450
    [3] International Trade Aspects of ISO 14000 ...................................... 450
