ACKNOWLEDGMENTS

The writing of a book requires the support of many people, and I am grateful to everyone that provided support over the last couple years. However first, I would like to not thank COVID-19 for causing countless issues and delays with the writing of this book. Everything would have gone much smoother if you had not arrived, so it is time for you to go. In spite of the challenges of the past couple years, this project did finally get completed and there are several people that were instrumental in this happening. First, I would like to thank my co-author, Mike. Who knew that this book would result from the conversations we had in those basement offices we were banished to in the basement of Baker Hall? Thank you for taking this journey with me — I'm confident I would not have gotten it done without you. Also, please thank Maggie for me for putting up with this. Next, I would like to thank Missouri State University. Even though producing scholarly works is part of my job, Missouri State provided support in several ways throughout this project, and for that I am grateful. Finally, last but certainly not least, I would like to thank my wife Stephanie and my children — Riley and Mason. Thank you. For so many reasons. Thank you, Riley and Mason, for reminding me to not always take everything so seriously and for always being there with a smile, or a magic trick, or to tell me about some new streamer that you were into, and you both are welcome for the "Did you know my dad was writing a book?" joke. Especially thank you to Stephanie for all the support you have given me over the last couple years. I certainly could not have done this without you. Thank you for your patience

and support with the amount of time that this project required. Thank you for your patience with the piles of articles and books that accrued in my workspace, that I know drove you crazy. Thank you for being there with words of encouragement when frustrations set in. Thank you for everything.

— **Mike Suttmoeller**

Before the completion of this book, I never thought that I would be capable of writing one. I certainly could not have done it without the support and encouragement of many people. First, I would like to thank my co-author Mike for bringing this to fruition. Without your efforts, encouragement, and pioneering spirit, this book would not have been possible. Second, I would like to thank the conservation departments, departments of natural resources, and officers who took part in our survey research on a variety of topics. While this book draws upon research from many sources, their contributions led to unique findings that put this book on the cutting edge of research on conservation policing in America. Finally, I would like to thank my family. Mom and Dad, thank you for the support and encouragement in both academic and outdoor pursuits that allowed me the opportunity to accomplish a lifelong dream such as this. To my kids, Hazel and Harlan, thank you for giving me the time to write this book, for putting a smile on my face when no one else could, and for keeping me from taking anything too seriously. To my wife Maggie, thank you for all of your love and support, not just in writing this book, but always.

— **Mike Rossler**
