# Series Note

Carolina Academic Press' state-specific criminal justice series fills a gap in the field of criminal justice education. One drawback with many current introduction to criminal justice texts is that they pertain to the essentially non-existent "American" criminal justice system and ignore the local landscape. Each state has its unique legislature, executive branch, law enforcement system, court and appellate review system, state supreme court, correctional system, and juvenile justice apparatus. Since many criminal justice students embark upon careers in their home states, they are better served by being exposed to their own states' criminal justice systems. Texts in this series are designed to be used as primary texts or as supplements to more general introductory criminal justice texts.
