Acknowledgments

The path to writing this book began when the Illinois legislature decided that it was in the state's best interest to examine what happened to long-term prisoners. Without their decision to take a holistic approach to the study of incarceration trends and the impact of prison on long-term prisoners, this book never would have been written.

This book could not have been written without the encouragement of David Hurley. Thank you for continued support of my scholarship.

I would like to acknowledge Beth Hall. Thanks for sticking with me through this process.

I have saved the most important for last—the long-term and elderly prisoners. Your experience of prison deserves far more attention than what can be included in this book. I hope that this edition continues to bring attention to your plight.
