Landyn Wm. Rookard, Harris, Wiltshire & Grannis LLP

Casebook, **Forthcoming summer 2020**, ISBN 978-1-5310-1416-2
Teacher's Manual forthcoming

Administrative law processes enhance participation, transparency, fairness, and access to information in administrative agencies and the government generally. The fourth edition of *Administrative Law and Process* highlights these issues in a timely manner through both classic and current cases. In Part I, we examine how agencies exercise their powers. In Part II, we explore the structural and constitutional issues that flow from legislative, executive, and judicial oversight. Key doctrines of administrative law are thoroughly addressed throughout this book, to which Part III adds a new dimension. It focuses directly on how lawyers actually practice administrative law through a series of drafting and strategic planning problems. The three parts of the book are closely interrelated giving professors the option of involving students in simulations that relate to the doctrines and issues they are studying.

Choice of Law***Patterns, Arguments, Practices***

Joseph William Singer, Harvard Law School

Casebook, Forthcoming summer 2020, ISBN 978-1-5310-1652-4**Teacher's Manual** forthcoming

This book provides a new way to learn about the topic of conflicts of law through experiential learning. Most books describe the approaches that have been adopted over time to decide conflicts of laws. This book describes those approaches and includes the emerging Third Restatement. To promote experiential learning, it does more: First, it explains patterns of cases so that students can fit new cases into established frames of reference. Second, it distinguishes between easy cases and hard cases so students can determine when a case cannot be easily resolved. Third, it provides detailed arguments that are typically made on both sides of hard cases that fit the typical patterns. Fourth, it concludes with moot court exercises that students could perform in class to practice advocacy in this field and judging.

Paul Benjamin Linton, Attorney-at-Law

Jacketed Hardback, 2020, 569 pp, ISBN 978-1-61163-684-0, \$95.00

Abortion under State Constitutions remains the only comprehensive treatment of abortion as a state constitutional right. Wade* abortion statutes. In addition to evaluating these developments, this edition discusses case law and statutory changes in other states that may bear on whether a state supreme court would recognize a right to abortion. This edition also includes an appendix of the constitutional provisions cited and a topical index.

These “bookends” guide students to better organize and synthesize the material. This edition also reworks the ever growing material of the Confrontation Clause, while continuing to be distinctive in highlighting ethical considerations concerning lawyers and the use of evidence.

Forthcoming summer 2020, ISBN 978-1-5310-1965-5, paper

This clearly written Understanding treatise is designed to explain what international law is, why it exists, and the basic subjects it covers. The law of treaties is given particular attention, chiefly because of the increasing importance of the treaty in international life. The number of treaties has mushroomed since the Second World War and many of these agreements include over 100 states as parties. Because of their number and the breadth of their coverage, treaties are thus the main form of international legislation.

LAW SCHOOL TEACHING**Lawyering Skills in the Doctrinal Classroom****Using Legal Writing Pedagogy to Enhance Teaching Across the Law School Curriculum**

Tammy Pettinato Oltz, University of North Dakota School of Law

Forthcoming summer 2020, ISBN 978-1-5310-0199-5, paper

After decades of taking a back seat to doctrine, lawyering skills have lately become the star of the legal education reform movement. Few law schools continue to question whether essential lawyering skills such as legal writing, research, and advocacy deserve a prominent place in the curriculum. Yet law schools continue to struggle with an artificial split between “doctrinal” courses and “skills” courses—a split that ignores best practices and undermines student learning. In *Lawyering Skills in the Doctrinal Classroom*, law professors who have figured out how to bridge the gap show why integrating skills into traditional doctrinal courses is crucial to student learning and offer proven strategies for how to do it.

LAWYERING SKILLS**Persuasion****Getting to the Other Side**

Joseph William Singer, Harvard Law School

2020, 208 pp, ISBN 978-1-5310-1225-0, \$28.00, paper

Lawyers have techniques to persuade decision-makers about what the law should be. Their normative toolkit uses arguments based on common values, storytelling, and framing to help us see our own values in a new light. These tools of reasoned argument enable us to engage in civil debate about divisive issues and to justify decisions in hard cases. *Persuasion: Getting to the Other Side* categorizes the arguments that lawyers use in debates about ambiguous or contested legal questions. It also explains how judges justify their decisions about what the law should be when the case involves competing values and there are plausible arguments on both sides. The goal is to provide law students with a toolkit to help them engage in reasoned arguments about what the law should be.

Mastering Interviewing and Counseling

Kelly M. Feeley, Stetson University College of Law

Rebecca C. Morgan, Stetson University College of Law

Forthcoming spring 2020, ISBN 978-1-5310-0705-8, paper

Because interviews and counseling sessions will look different every time you conduct them, you need to have guidelines that are both helpful and flexible. *Mastering Interviewing and Counseling* coaches readers, giving them both the big picture view of the field as well as providing some of the more nuanced and subtle plays to help them deal with varied situations. This is a book designed to help the law student, new lawyer, or anyone who will be tasked with interviewing others in both legal or non-legal scenarios. It's meant to be simple to read, follow, and understand—with the goal of making interviewing and counseling seem less daunting, more conversational, and easier.

LEGAL HISTORY

Jim Crow in North Carolina***The Legislative Program from 1865 to 1920***

Richard Paschal, Schwartz & Shaw, PLLC

Forthcoming summer 2020, ISBN 978-1-5310-1771-2, paper

This book catalogs all of the Jim Crow laws enacted by the North Carolina legislature between 1865 and 1920, but the author argues that the application and implementation of the laws was much more important on the ground than the statutory text. The author contends that the racial contagion that swept the state during the elections of 1898 and 1900—the White Supremacy Campaigns—dramatically changed white attitudes in such a way that the application of the laws changed dramatically as well.

The Cherokee Supreme Court***1823–1835***

J. Matthew Martin, Administrative Law Judge

Forthcoming spring 2020, ISBN 978-1-5310-1841-2, paper

This book demonstrates how the Cherokee people—prior to their removal on the Trail of Tears—used their judicial system as an external exemplar of American legal values, while simultaneously deploying it as a bulwark for tribal culture and tradition in the face of massive societal pressure and change. Extensive case studies document the Cherokee Nation's exercise of both criminal and civil jurisdiction over American citizens, the roles of women and language in the Supreme Court, and how the courts were used to regulate the slave trade among the Cherokees.

The text explains the legislative process; describes the difference between bills, acts, statutes, regulations, and guidance documents; explores the sources of meaning and the theories of interpretation; explains the linguistic and policy-based canons of interpretation; and introduces the administrative state. Throughout, the text refers to the major cases in each area of study to coordinate with the major textbooks in the field. Finally, each chapter provides a concise roadmap and summary to introduce and encapsulate the most important material in that chapter.

Regulatory Law and Policy***Cases and Materials****Fourth Edition*

Sidney A. Shapiro, Wake Forest University School of Law
 Joseph P. Tomain, University of Cincinnati College of Law

Casebook, 2020, 584 pp, ISBN 978-1-61163-913-1, \$180.00
Teacher's Manual forthcoming

The central theme of *Regulatory Law and Policy* is the concept that the practice of regulatory law involves the interrelationship of law, policy analysis, and politics. While the legal limits of regulation are explored in many law school courses, this book emphasizes policy analysis and politics. This fourth edition adds two new features. First, it explores contemporary problems such as the legalization of marijuana and the status of rideshare activities of companies such as Uber and Lyft. In addition, it presents practice problems for the students to think through and apply the policy analyses discussed throughout the book.

Rather than offering a staid recitation of military court rules and cases, this volume gives law professors a powerful tool to introduce students to military justice while also deepening their understanding of criminal law and procedure, comparative law, international law, and constitutional law. At a time of ongoing combat operations and high-profile courts-martial, students and professors now have a new framework through which to analyze and evaluate worldwide military justice.

Sherri Lawson Clark, Wake Forest University

Casebook, **Forthcoming summer 2020**, ISBN 978-1-61163-560-7
Teacher's Manual forthcoming

Poverty Law: Cases and Materials begins by engaging students in thinking about what it is like to be poor and questioning commonly held conceptions about the poor. The book demonstrates that while programs may effectively become stop-gap measures preventing families from falling into utter destitution, they do not enable families to effectively leave poverty. Part III discusses the structures for advocacy in the legal system and the role of lawyers who represent the poor.

PROPERTY LAW

This book covers the traditional property law subjects, but it makes the subject come alive by using assessments that require students to understand aspects of property transactions that are important today. It covers the subjects that have long formed the backbone of a property law course—personal property, real estate transactions, servitudes, leases, common law estates, and land regulation.

Fundamentals of Property Law
Fifth Edition

Barlow Burke, American University College of Law
Ann M. Burkhart, University of Minnesota Law School
Thomas P. Gallanis, University of Iowa School of Law

Casebook, 2020, 1034 pp, ISBN 978-1-5310-1658-6, \$220.00
Teacher's Manual

Now in its fifth edition, the strength of *Fundamentals of Property Law* has always been its comprehensiveness in both a traditional and innovative sense: The use of statutes makes it possible to focus some classes on statutory analysis. Shorter judicial opinions make it possible to lay out fundamental rules in one opinion and show their application in another. With these objectives in mind, the authors have followed four guidelines in preparing the casebook: (1) case selection has emphasized rules that are widely accepted in practice; (2) shorter cases have been preferred over longer ones; (3) many of the cases and notes that follow them deal with questions of statutory interpretation; and (4) the nature of the law of property is illuminated by many disciplines—much of the material in the casebook lends itself to a broad approach to the law.

This book is specifically designed to be user-friendly and will help students seeking mastery of this area with a GPS of sorts that will help them navigate this challenging landscape. Rather than delving too deeply into case law (a common practice in other textbooks), it highlights general concepts and ideas, focusing intently on those techniques and procedures that twenty-first century practitioners are employing today with their clients.

TORTS (ALSO SEE PAGE 1)

The Modern Law of Torts
A Contemporary ApproachDouglas Lee Donoho, Nova Southeastern, Shepard Broad
College of Law**Forthcoming summer 2020**, ISBN 978-1-5310-1294-6
Teacher's Manual forthcoming

Unlike many textbooks, *The Modern Law of Torts* takes a very different approach to the role of cases. Each chapter starts with, and includes throughout, significant narrative explanations, laced with illustrations and guidance, rather than simply relying on a set of edited cases. Learning goals and outcomes are expressed for each chapter, followed by a clear pattern of assignments and problems that track those goals. Cases, almost all of which are recent, are included as illustrations of application, to expose dilemmas or problematic aspects of the doctrine, and as the means for problem solving. Students are expected to use the cases to problem solve, not simply read them to learn the rules. The book also takes a more practice-orientated approach than most, presenting frequent practical information and periodic practice-oriented exercises.
