CONTENTS

Preface	xiii
Chapter 1 Introduction	1
Chapter 2 The Unfinished Agenda	11
Success Stories	11
The Unfinished Agenda	14
Clean Air	15
Clean Water	19
Product and Workplace Safety	20
Natural Resources	21
A Different Agenda	23
Conclusion	26
Chapter 3 Progressive Principles	27
Progressive History	27
Address the Source, Not the Victim	28
Do the Best We Can	29
Reduce Ignorance	30
Better Safe than Sorry	31
Be Fair	32
Public Resources Belong to Everyone	33
Progressive Principles Do Not Have Borders	34
Democracy Demands Disclosure	35

vi CONTENTS

We Have a Right to Know	36
Make Government Work	37
Use Self-Help	38
Chapter 4 Shifting the Blame	41
The Blame Game	41
The Ghost of Coase	42
Manufacturing Consent	44
Ignoring Public Desires	48
Making People Invisible	49
The Progressive Perspective	51
The Progressive Agenda	53
Change Attitudes	53
Let Children Play Outside	53
Do Not Discriminate Against ‘Statistical People’	53
Prefer Risk Reduction over Risk Avoidance	54
Protect Workers	54
Redress Harm	54
Conclusion	55
Chapter 5 Do the Best We Can	57
Harnessing Technology	57
How the Best-Efforts Approach Works	57
Best Efforts in the Beginning	58
Best Efforts Expanded	59
Why Best Efforts Work Better	60
The Unfair ‘Command-and-Control’ Critique	62
The Progressive Perspective	65
The Progressive Agenda	68
Pick the Remaining Low-Hanging Fruit	68
Reach Higher	69
Force Technology	69
Conclusion	70

	CONTENTS	vii
Chapter 6 Rescuing Science from Politics		71
The Role of Science		71
Suppression of Science		72
Capturing the Research Agenda		75
The Progressive Perspective		77
The Progressive Agenda		78
Preserve Scientific Freedom		79
Ensure Scientific Transparency		79
Encourage Scientific Honesty		79
Expand Public Funding		80
Use Peer Review Appropriately		80
Chapter 7 Safety First		83
Providing a Safety Net		83
Gaps in Coverage		86
Burdens of Proof		87
Enforcement Loopholes		88
Exemptions		90
‘Sound’ Science		91
Judicial Overreaching		92
The Progressive Perspective		93
The Progressive Agenda		96
Adopt a Credible Worst-Case Analysis for Risk-Based Regulation		96
Make the Polluter Justify the Pollution		97
Fix the Broken Statutes		97
Put the Burden on Risk Creators		98
Eliminate Paralysis by Analysis		98
Judges Should Be Judicious		99
Conclusion		100
Chapter 8 Fair Distribution of Environmental Harms and Benefits		101
Environmental Fairness		101

VIII CONTENTS

Geographic Inequality	102
One-Size-Fits-All Health Standards	105
Unfair Process	106
The Progressive Perspective	107
The Progressive Agenda	109
Provide Fair Access to Decision Making	109
Incorporate Fair Distribution into All Government Decisions	110
Apply the Letter—and the Spirit—of the Civil Rights Laws to Environmental, Health, and Safety Decisions	112
Conclusion	113
Chapter 9 Public Resources for Public Uses	115
Sound Stewardship	115
The Public Interest at Risk	117
Privatization and Expanded Private Control	119
Understanding the Pressure to Expand Private Control over Public Resources	120
The Progressive Perspective	123
The Progressive Agenda	123
Better Assessments Mean Better Decision Making	124
Harmful Exploitation Must Not Be Exempt	125
Fund Long-Term Protection for Public Resources	125
Ensure Government and Corporate Accountability	126
Conclusion	127
Chapter 10 Think Globally	129
The Imperative of Multilateralism	129
The Consequences of Unilateralism	131
The Progressive Perspective	132
The Progressive Agenda	133
Provide for Transparent and Participatory Engagement	133
Apply NEPA to Actions with Global Effects	134
Ensure the Use of Science in Global Affairs	134
Bridge the North–South Gap	135
Promote Corporate Responsibility and Trade	136
Conclusion	138

Chapter 11 Democracy Demands Disclosure	141
The American Tradition of Open Government	141
Stealth Secrecy	143
Choosing Ignorance	146
The Progressive Perspective	148
The Progressive Agenda	150
Keep Government Open and Transparent	150
Stop Stealth 'Reform'	151
Develop and Gather Knowledge	152
Publish Annual State Environmental Indicator Reports	152
Score State Performance	152
Strengthen SEC Disclosure Requirements	153
Expand Corporate Chemical Use Reporting	153
Require Corporate Environmental Assessments	153
Tell Companies to Inform and Warn the Public	154
Expand Toxic Chemical Testing	154
Enact a Corporate Freedom of Information Act	155
Conclusion	155
Chapter 12 Make Government Work	157
The Choice of Tools	157
Condition Precedent: Hollow Government	159
Useful Tools	160
Technology and Design Standards	160
Substance Bans	162
Liability Provisions	162
Neutral Tools	163
Information Disclosure	163
Emissions Trading	163
Performance-based Regulation	167
Harmful Tools	169
Pre-decisional Analysis	169
Voluntary Programs	170
The Progressive Perspective	171
The Progressive Agenda	172
Resuscitate Government	172

x CONTENTS

Fund the Restoration of Government through Emissions	
Fees and Fee-for-Service Provisions	173
Make Technology-based Requirements	
the Default Regulatory Approach	174
Impose Liability in the Right Circumstances	174
Streamline Pre-decisional Requirements	175
Abandon Cost-Benefit Analysis as a Regulatory Litmus Test	175
Only Trade Fair	176
Conclusion	176

PREFACE

This book represents the collective effort of many scholars associated with the Center for Progressive Regulation (CPR). It is fair to say that the perceived need in the progressive community for books like this one is the primary reason for CPR's existence. CPR is an organization of scholars established in 2002 to provoke public debate on how the government's authority and resources may best be used to advance the multiple social values that motivated the enactment of our nation's environmental, health, and safety laws. At the heart of CPR's mission are the dual convictions that an informed populace is essential to an effective and humane government and that government performs legitimate and essential functions when it serves as a forum for debate and action on social values. Government must act wisely, responsibly, and effectively, but it ought not to abandon these essential functions.

Like most collective efforts, this project required leaders who were willing to devote an added measure of time and effort to ensure that the resulting product flowed together as a coherent whole. CPR Board members Christopher Schroeder and Rena Steinzor, and CPR media consultant Matthew Freeman served as the primary editors for the project. They relied throughout the process on the research and editorial assistance of CPR's accomplished senior policy analyst Joanna Goger. Theresa Walker copy-edited the manuscript ably.

The work began with an exceedingly productive gathering of CPR scholars at Duke University in May 2003 under Chris Schroeder's able leadership. It continued throughout the following summer as individual scholars took responsibility for drafting chapters or parts of chapters for the book. The products of these individual efforts were collectively reviewed and debated at a gathering of the authors at Georgetown University in October 2003. Chris assembled the revisions that resulted from this meeting into a thematic whole, and Rena Steinzor edited the entire manuscript for coherence and consistency. In the meantime, Joanna Goger devoted many long hours to preparing the examples in the text boxes and refining the citations and references. Matthew Freeman provided the icing on the cake by making the manuscript more ac-

XIV PREFACE

cessible to audiences who are not as steeped in the technical vernacular as the scholars.

In addition to Chris, Rena, Matthew and Joanna, I would like to thank the following CPR scholars who provided the essential analysis and ideas expressed in this book. Primary authors included Alyson Craig Flournoy, Robert L. Glicksman, Donald Thomas Hornstein, Douglas A. Kysar, Lisa Heinzerling, Thomas O. McGarity, Clifford Rechtschaffen, Sidney A. Shapiro, Robert R.M. Verchick, and David A. Wirth. Other contributing authors included Frank Ackerman, David M. Driesen, Sheila Foster, and Wendy E. Wagner. Introductions to all of the scholars are available on the CPR website at <http://www.progressiveregulation.org>.

Because this book is a collective effort, it goes without saying that every CPR scholar may not agree with every aspect of the analysis presented here, and not every scholar necessarily supports every prescription offered here. The book does represent a consensus of the CPR leadership, and it forms an essential foundation for future CPR efforts to bring progressive approaches to environmental, health, and safety regulation to the attention of policymakers and the public.

Finally, this book would not have been possible without the generous financial support of the Deer Creek Foundation, which took the initial leap of faith needed to bring CPR into existence and has provided continuing support to all of CPR's educational efforts. The Howard and Anne Gottlieb Foundation provided additional support for the publication of this book and the promotion of the progressive agenda contained therein. In these troubled times, it is institutions like the Deer Creek and Gottlieb foundations that in tangible ways project the optimism that is the essence of the progressive vision.

Thomas O. McGarity
President
Center for Progressive Regulation
